The Learjet 85 rested on Rodeo Drive during the Concours d'Elegance Father's Day celebrations.

If you wandered down Rodeo Drive in Beverly Hills this past Sunday, chances are you saw something out of the ordinary adorning the street—a full-sized jet. To celebrate Learjet's 50th anniversary, [Bombardier](#) (the world's largest manufacturer of business aviation) and [Flexjet](#) parked the Learjet 85 aircraft in the middle of Rodeo Drive during the famous street's annual Concours d'Elegance Father's Day celebration. The full-scale mockup of the Learjet 85 provided guests with a close-up look at one of the most luxurious forms of transportation in the world.

Designed from a clean sheet by Bombardier Aerospace, the Learjet 85 is the first business jet built primarily from carbon composites in both the wings and fuselage and features the latest advances in aerodynamics, structures, and efficiency. The aircraft features a spacious stand-up cabin, transcontinental range, and powerful low-emission engines for a convenient and lavish experience.

While it's not an everyday purchase, the jet is available for fractional jet ownership exclusively through Flexjet, one of the world's most exclusive private jet companies.
