

FLEXJET

BE THE FIRST TO TAKE HER AROUND THE WORLD. ✈️

THE WORLD, AT YOUR WINGTIPS.

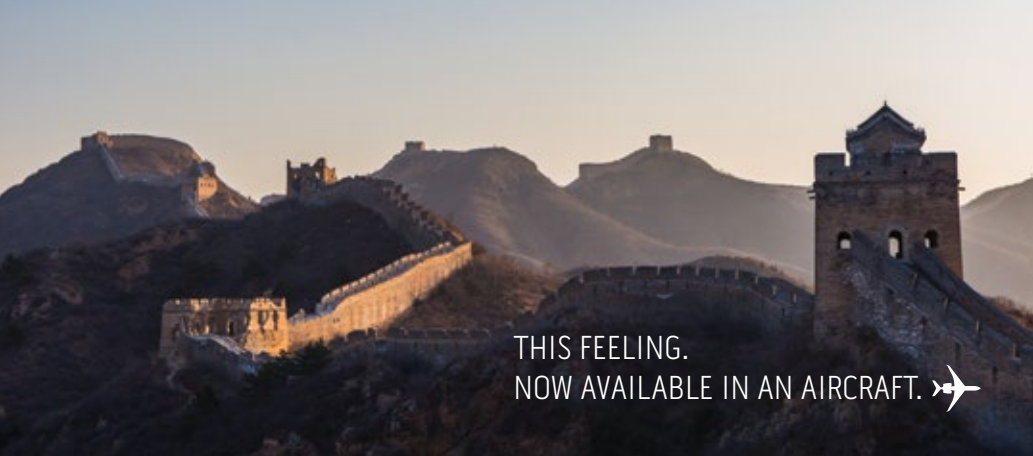

The Gulfstream G450 continues the legacy of excellence that Gulfstream has earned during nearly six decades as a business jet manufacturer. As the successor to the GIV, the G450 doesn't represent progress for the sake of progress. Instead, each improvement in design and performance elevates the jet, while preserving what made the GIV a world-class aircraft.

The G450 is the quintessential business jet. Add it to your company's fleet, and this aircraft instantly raises the profile of your leadership team. It's not just a mode of transportation; it's an airborne dealmaker.

This jet makes a statement wherever you land. The trademark elliptical windows and classic silhouette are unmistakable to anyone who knows what to look for. Upon seeing a G450 taxi down the runway, one question inevitably springs to mind: "Who could be in there?"

INTRODUCING OUR INCOMPARABLE GULFSTREAM G450.

THIS FEELING.
NOW AVAILABLE IN AN AIRCRAFT. ✈️

GO THE DISTANCE.

The Gulfstream G450 is at its best when used for intercontinental travel. Fly from New York City to anywhere in Europe, propelled by powerful twin Rolls-Royce engines. Low-altitude cabin pressure and a cruise speed of Mach 0.85 means you arrive refreshed and on time.

The luxuriously comfortable interior will make flight times pass quickly; so quickly, in fact, that you might not realize just how long the G450 is able to stay aloft. The range and speed capabilities of this jet make overseas travel all but trivial. There's only one way describe the feeling of taking off in a G450: Powerful.

Wherever your travels take you, the G450 is engineered to fly you there with your entire team – up to 16 total associates. It's purpose-built for productivity, but calling it a mobile conference room doesn't do this jet justice – no conference room offers a view like this.

WELCOME ABOARD.
THIS IS WHERE IDEAS THAT SHAPE THE WORLD ARE BORN. ✈️

TAKE A MOMENT. THEN TAKE ANOTHER.

When you step onto the Gulfstream G450, years of research and countless hours spent by aviation's top designers and engineers coalesce into an awe-inspiring first impression. When you sit down, the ergonomic seat encourages your natural posture; controls are found where you intuitively reach, giving you a sense of familiarity, even if it's your first time aboard.

When you leave the ground and begin your ascent, reflect on where you are. This seat is reserved for a select few, and you earned it through an unwavering dedication to the pursuit of success. The effort isn't over yet; there's work waiting to be done on this flight — but before you begin, take a moment, peer through the iconic oval windows at the Earth stretched out below, and take it all in.

EFFORTLESS ELEGANCE. ✈️

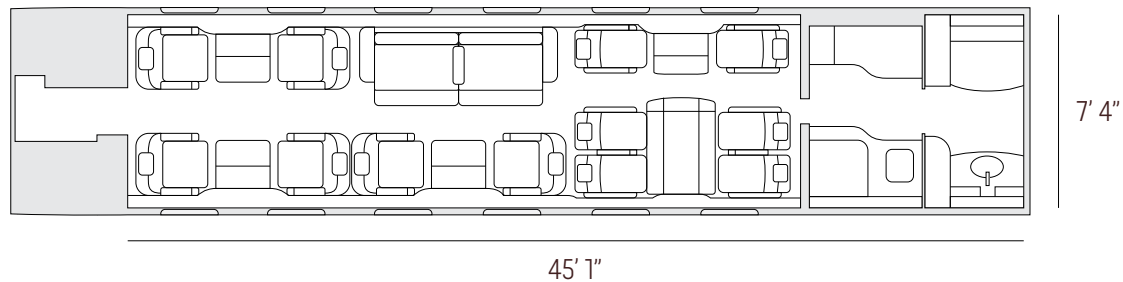

THE PRODUCT OF PEDIGREE, SOPHISTICATION & STYLE.

The Gulfstream GIV was a long-time favorite among elite private travelers, and a tough act to follow. But rather than reinventing the wheel, the G450 improved upon a tried-and-true model in ways that the discerning traveler will appreciate.

The cabin has space for up to three living areas, two lavs and a full-sized galley, with seating for up to 16 guests and lie-flat sleeping accommodations for six. You won't find a flight experience like this anywhere else, because Flexjet has partnered with Gulfstream to design three stunning custom interiors. Using state-of-the-art textiles that are acoustically engineered to dramatically reduce cabin noise, Flexjet's G450s provide a quiet, comfortable flight that will redefine your idea of air travel.

Productivity is essential in this class of jet, which is why a seven-channel Honeywell satellite communications system is included to maximize Internet speed and telephone reliability. Performance has always been one of the GIV's points of pride, and the G450 boasts a 6% increase in both range and fuel efficiency. Take off in London and fly non-stop to Beijing; after a few flights between continents, far-off destinations won't seem so remote.

Gulfstream has always led the industry in developing innovative safety technology, and that tradition continues in the G450. This jet comes equipped with the Enhanced Vision System (EVS) and Head-Up Display (HUD). These systems use a nose-mounted infrared camera to detect and display the jet's surroundings on four 14-inch LCD monitors, allowing pilots to more easily navigate low-visibility conditions.

YOUR WINDOW TO THE WORLD.

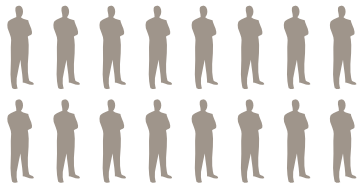

The Gulfstream G450 is the latest in a long line of exceptional business aircraft. It keeps with a tradition of high luxury and design, while continuing to push the boundaries of performance and technology.

Through an exclusive arrangement with Gulfstream, Flexjet is the only fractional provider of new G450s. We're excited for the opportunity to work closely with Gulfstream, an organization that provides new G450 owners access to an incredible aircraft service and support network. The award-winning Gulfstream Product Support program is built on a team of service professionals who are on call 24 hours a day, 365 days a year to service your aircraft no matter where you are in the world. With the G450, you can travel across oceans and continents with absolute peace of mind.

When you land in a G450, you're sending a clear message to the world that you've arrived. It's a message that transcends language, and proof that the most powerful statements are the ones you make without saying a word.

PASSENGER CAPACITY

16 Passengers

BAGGAGE CAPACITY

169 ft³ (cubic feet)

SPEED & RANGE

NORMAL CRUISE SPEED

548 mph

MAXIMUM OPERATING RANGE

4,835 sm

CABIN DIMENSIONS

CABIN LENGTH, WIDTH & HEIGHT

45'7" x 7'4" x 6'2"

CABIN AMENITIES

Power Outlets

Telephone

Video Monitors

Airshow System

DVD Player
